EUDI Wallet Certification

Scheme development status

Recap: What about the scheme

National or European?

European scheme being developed

- ENISA work started in 2025
- Only for cybersecurity aspects

National schemes developed in parallel

- Our main focus
- Must cover the entire scope

One scheme or several?

The regulation mentions “the certificate”

- There must be a “top-level” certificate
- This is what the Implementing Act is describing

But it will be a composite certificate

- Other schemes will be used
 - EU schemes (EUCC, EUCS(?), EUMSS(?))
 - National schemes (FitCem)

The national EUDI wallet scheme

The National EUDI wallet scheme

Some Member States are informally collaborating on a harmonised certification system

In NL:

- › BZK in the lead
- › RDI consultant

System of certification schemes

- Certification system:
 - Rules and procedures for the management of similar/related certification schemes
- Certification scheme
 - Rules and procedures based on the system, to certify a EUDIWallet

ISO/IEC 17067

Structure of the Certification System

Certification System approach

Approach:

- › Horizontal requirements
 - Taking into account different structures, different approaches
 - ‘file rouge’: what is needed for certification & trust
- › TR3, 4, 5: requirements for functional, cybersecurity, wallet & eID provider requirements
- › TR3.x, TR4.x, TR5.x technical requirements
 - Contribution, collaboration on the contents

Building a certification scheme will require collaboration between scheme owner, competent authority and wallet provider

- › Manage interdependencies
- › Composite certification approach
- › Relation with PID provider

The European EUDI wallet scheme

The European EUDI wallet scheme (1)

What happened since the previous stakeholder meeting (18/12/'25)

- › ECCG meeting 19/2
 - The Commission informed the ECCG of the decision to fast-track the publication of the draft EU scheme to late March 2026
- › 1st April
 - publication of the draft EU scheme and distribution to the ECCG members for review
- › ECCG meeting 14/4
 - The Commission informed the ECCG of the following schedule:

The European EUDI wallet scheme (2)

- › ECCG meeting 26/6
 - Detailed comments were provided by nine Member States (FR, DE, AT, IT, NL, PL, SK, FI, ES) along with a non-paper signed by seven Member States (HR, EE, FI, IE, LV, LT, SE)
 - The main feedback from ECCG members is that the scheme remains **immature, needing more details** (e.g. on composition, reuse evidence, assurance levels) **and concrete requirements** (e.g. on architecture specific rules, integration with national certification schemes).
 - Conformity Assessment Bodies (CABs) underlined, during the last AHWG plenary, the need for additional details to perform their evaluation
 - ENISA presented a plan on how to move forward with the draft CSA candidate scheme which contains five steps: update, implementation, consolidation, adoption, and revision. Main objective is to ensure a smooth migration to the CSA scheme which would occur for the re-certification of the EUDI Wallets or earlier if new Wallets are being developed in the meantime. This is expected **by 2030** and by then, the CSA scheme needs to be ready and mature
